Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3683

1. Receipt is acknowledged of the amendment filed on 4/19/2004.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 22-30 and 32, 34, 35 and 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over British publication 1,257,827 in view of Kroeker et al.

Note the previous discussions of 1,257,827. Flow through the valves corresponds that as recited when the check valves are closed.

The claimed invention differs only in the type of control valves.

Kroeker et al. show adjustable control valves having discrete user selectable settings in a shock absorber (note valves 88, 90).

It would have been obvious to one of ordinary skill in the art to have utilized manually adjustable valves in the shock absorber of Publication .827 in view of the teaching of Kroeker et al. so as to provide greater control of the shock absorber such as taught by Kroeker et al.

4. Applicant's arguments filed 4/19/2004 have been fully considered but they are not persuasive. Contrary to Applicants contention, the flow is controlled in the manner recited while the check valves in BP 1,257,827 are closed.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3683

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

6. Any inquiry concerning this communication should be directed to Matthew C Graham at telephone number 703-308-2570.
